SIEBERT BL-7M

SIEBERT BL-7M is a biodegradable, non-flammable, ultra-low V.O.C. wash for automatic brush-style blanket washers on a lithographic printing press. SIEBERT BL-7M works great on UV, EB, and conventional printing inks.

SIEBERT BL-7M has the unique ability to be printed on while the blanket is still wet. Blankets washed with this product will return to color noticeably faster when compared to solvents and other V.O.C. reduced products. Because of its superior cleaning and lubricating properties, automatic washer settings can be reduced by 50 to 80% compared to solvents and other V.O.C. reduced products. This also helps eliminate dripping and gap slinging typically associated with brush-style blanket washers.

Less waste, reduced blanket piling, and reduced wash consumption make SIEBERT BL-7M very cost effective. (Exact amount required may vary by equipment manufacturer. Consult your equipment manufacturer regarding any possible retrofit packages or modifications necessary to minimize consumption.)

Features

- Ultra-Low V.O.C.
- 100% biodegradable
- Virtually eliminates dripping caused by automatic washers
- Faster start-ups / less waste
- Reduces blanket piling
- Non-regulated by DOT
- Meets EPA / OSHA regulations
- Cost-effective
- Patented technology

Physical Properties

- Boiling Point @ 760mmHg:
212° F
- Vapor Pressure @ 80° F:
0.1 mm Hg
- % Volatile by Volume:
<2%
- VOC:
0.15 lb/gallon
- Flash Point (TCC):
300° F
- Water Solubility:
Miscible

HMIS Information

- Health: 1
- Flammability: 0
- Reactivity: 0
