IL-10 UV Wash

IL-10 UV Wash is a slower-drying traditional press wash for cleaning ultraviolet cured ink. It is formulated safe on EPDM rubber rollers and blankets with a 20+ year track record. IL-10 is water miscible and can also be used to clean dampening system rollers (MRC). It quickly cleans emulsified ink from metering rollers without contaminating water system.

Physical Properties

- Boiling Point:
207°F
- Vapor Pressure @ 68°F:
2.55 mmHg
- % Volatile by volume:
100
- Volatile Organic Compound:
7.42 lb/gallon
- Flash Point (TCC):
74°F
