RB-142A Blanket Wash

RB-142A is a slow drying, very low odor, water miscible blend of high flashpoint solvent and emulsifiers designed for larger format presses. It can be used as a manual blanket and roller wash or in most automatic blanket and roller washing systems. It is extremely mild on rubber rollers and blankets and because of its high flash point is easy to store and transport. RB-142A can also be used as a step two roller wash in a 2-step roller cleaning system. This blend is approved by most OEM equipment manufacturers.

Physical Properties

- Boiling Point:
405°F
- Vapor Pressure @ 68°F:
1.8 mmHg
- % Volatile by volume:
98%
- Volatile Organic Compound:
6.95 lb/gallon
- Flash Point (TCC):
142°F
